

SARscene 2026
Saskatoon, Saskatchewan

Live on-water demonstrations

Seal Craft in action

See purpose-built rescue craft on the water. Live demonstrations and hands-on training run all week on the river beside the conference hotel, open to every attendee.

Dates

October 7-11, 2026

Runs alongside the SARscene
National Conference & Training

Where

**Delta Hotels by Marriott Saskatoon
Downtown**

River launch beside the hotel — map on the back

Booths 9 & 10

Open to all show attendees

Purpose-built for response

Built for the conditions search and rescue teams actually work in.

Heavy-duty TPU hull

Patent-pending 3,000-denier TPU with a 1 mm TPU film resists abrasion and punctures, and stays flexible in the cold.

Internal bladder safety

Multiple air chambers and built-in pressure management keep the hull dependable in demanding operations.

Extreme jet performance

A true tunnel hull with an aluminum transom and jet-intake pad, plus Cat Pods that run in extremely shallow water.

Trailer-ready deployment

A roller-trailer design lets a small team launch and recover the boat fast.

Book a demo or training slot

Stop by anytime during the show. To reserve a specific day and time for your team, email or text Andy.
